

*****IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER*****
Tri County Point Water System 3 (TX1200028) Jackson County, TX
Monitoring and Reporting Violation for Revised Total Coliform Rule (RTRC) June 2022

Our system failed to collect every required coliform sample. Although, this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation. We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During June of 2022 we did not complete all monitoring or testing for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time.

What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

What is being done?

This happened before CSWR took ownership of the system. Since then we have collected and reported all required coliform samples.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

For more information, please contact Central States Water Resources Texas UOC Customer Experience by phone at 1-866-301-7725, by email at support@cswr texaswateruoc.com, or by mail at 1630 Des Peres Road, Suite 140, St. Louis, MO 63131.

This notice is being sent to you by TRI COUNTY POINT WATER SYSTEMS 3.
