26. CSWR-Texas does not have a history of continuing mismanagement or misuse or revenues as a utility service provider.
27. CSWR-Texas demonstrated a compliance history that is adequate for approval of the transaction.

Adequacy of Existing Service

28. There are currently 67 connections in the requested area that are being served by Cassie Water through public water system number 0270047 and such service has been continuous and adequate.
29. The last TCEQ compliance investigation of Cassie Water's water system was on March 19, 2019.

31. The Commission's complaint records, which date back to 2017, show one complaint against Cassie Water.

32. There is no evidence in the record that Cassie Water has failed to comply with any Commission or TCEQ order.

Need for Additional Service

33. There are 67 existing customer connections in the requested area that are receiving service from Cassie Water and have an ongoing need for service.
34. This is an application to transfer only existing facilities, customers, and service area.
35. There have been no specific requests for additional service within the requested area.

Effect of Approving the Transaction and Granting the Amendment

36. CSWR-Texas will be the sole certificated water utility for the requested area.
37. CSWR-Texas will be required to provide continuous and adequate water service to current and future customers in the requested area.
38. Landowners in the requested area will have a water service provider available when they need to request water service.
39. All retail public utilities in the proximate area were provided notice of the application and no protests or adverse comments were filed.
40. There will be no effect on any retail public utility providing service in the proximate area.

Ability to Serve: Managerial and Technical

43. CSWR-Texas employs or contracts with TCEQ-licensed operators who will operate public water system being transferred.

service to the requested area, and was keyed to a map showing where such facilities will be located to provide service.

Feasibility of Obtaining Service from Adjacent Retail Public Utility

47. Cassie Water is currently providing service to customers and such service has been continuous and adequate.
48. Obtaining service from an adjacent retail public utility would likely increase costs to customers because new facilities will need to be constructed. At a minimum, an interconnection would need to be installed in order to connect to an adjacent retail public utility.
49. It is not feasible to obtain service from an adjacent retail public utility.

Regionalization or Consolidation

50. It will not be necessary for CSWR-Texas to construct a physically separate water system to serve the requested area.

Ability to Serve: Financial Ability

52. CSWR, LLC, the immediate parent company of CSWR-Texas, is capable, available, and willing to cover temporary cash shortages, and has a debt-to-equity ratio that is less than one. Therefore, CSWR-Texas satisfies the leverage test.
53. CSWR, LLC provided a written guarantee of coverage of temporary cash shortages and demonstrated that it has sufficient cash available to cover any projected operations and maintenance shortages in the first five years of operations after completion of the transaction and possesses the cash and leverage ability to pay for capital improvements and necessary equity investments. Therefore, CSWR-Texas satisfies the operations test.
54. CSWR-Texas demonstrated the financial capability and stability to pay for the facilities necessary to provide continuous and adequate service to the requested area.

Financial Assurance

55. There is no need to require CSWR-Texas to provide a bond or other financial assurance to ensure continuous and adequate service.

Environmental Integrity and Effect on the Land

56. The requested area will continue to be served with existing infrastructure.
57. There will be minimal effects on environmental integrity and on the land as a result of CSWR-Texas' planned upgrades, renovations, and repairs to the water system.

Improvement of Service or Lowering Cost to Customers

58. Water service to the requested area is expected to improve because CSWR-Texas intends to make upgrades, renovations, and repairs necessary to improve the safety and reliability of service.
59. The rates charged to customers in the requested area will not change as a result of the proposed transaction because CSWR-Texas will adopt the currently in effect tariff for the water system upon approval of the transaction.
