**SEBASTIAN LAKE: WATER CONSERVATION ADVISORY**  
**August 9, 2022**

Dear Sebastian Lake Residents:

We have been instructed by Sebastian Lake water supplier (James Fork Regional Water District), to implement “**Phase II Water Conservation**” until further notice.

This consists of the following steps:

- Cease watering lawns (prohibited)
- Shrubs, plants, trees and gardens may be watered only with handheld hose
- Cease car washing, swimming pool or fountain refilling (prohibited)
- Do not hose down sidewalks, walkways, driveways, patios, parking lots, or any other hard surface areas

Your efforts will help ensure an equitable supply to meet increased demands during these extreme weather conditions. We will keep you updated as we receive any new information from James Fork Regional Water District.

If you wish to see the James Fork Regional Water District notification, we have it posted on the “Community Impact” section of [sebastianlakeuoc.com](http://sebastianlakeuoc.com).

Thank you for your understanding and cooperation in this matter.
